COMPANY HISTORY FROM THE CHAIRMAN

100 years and counting...In the beginning, 1913, the partnership of Siegfried R. Fanta and Richard Pollak brought the all-cotton elastic bandage to the U.S.A. from Germany and formed The Tetra Company. The company located at 350 N. Clark Street; Chicago, Illinois in Room 213. The number 4 in the circle became the trademarked company logo adopted from the Greek definition of the word "tetra".

The Fanta/Pollak partnership continued until 1945 when Ernest Pollak being the sole surviving relative took over the business. Over the years the business fell on hard times and Ernest Pollak surrendered the business to his lawyer, Joseph Kotz, in payment of his legal fees.

Joseph Kotz incorporated The Tetra Company in the state of Illinois on October 1, 1953.

Mr. Kotz hired James Shier in April of 1963 as his assistant. Jim's duties included ordering inventory, order taking, order filling, shipping, invoicing and going on sales calls with Mr. Kotz. Shortly thereafter, Jay Hearst, looking for a new business opportunity approached Joe Kotz to buy him out over a period of years.

Product wise, from 1913 to the early 1950's the all-cotton Tetra bandage was the only product of The Tetra Company. By 1964 we had three lines of rubber-reinforced elastic bandages as well as the all-cotton. Rib belts led the way for other orthopedic soft-good products. Anti-embolism stockings came shortly after and in the 70's it seemed like we had something new every month, some successful, others not so much. Our main focus has always been elastic bandages as we continue to improve weaves, closures, lengths and packaging.

By 1965 we outgrew our space at 350 N. Clark and had a new 2500 square foot building constructed at 2744 N. Southport Avenue in Chicago.

Jay Hearst's buy-out was complete in January of 1968 and Mr. Kotz left the business. The size of the business now made it necessary to have a full time clerical person so Jay Hearst asked Jim if I would be interested in coming in to answer the phone. I started at Tetra on February 1, 1968.

During 1969 we outgrew the Southport building and we moved to 2850 N. Lincoln Avenue, also in Chicago. The initial structure was 7500 square feet which was expanded to 9000 square feet as we grew.

In 1976, Jay Hearst moved his family to Boulder, Colorado and found it difficult to deal with the growing pains from that distance. By that time we had a staff of five outside salespeople as well as five full time inside people. Jim was vice president and I was the controller so we took the next logical step when Jay wanted to sell and offered to buy him out. The sale was complete in December of 1977.

In 1983, once again growth necessitated a move to our present building at 6364 W. Gross Point Road in Niles, Illinois. Although our children have worked on and off with us since 1977, James, Jr., who we call J.R., came to work permanently in 1983 when we moved to Niles. He has learned the business from the ground up and now serves as our President. Jim Shier, Sr. retired in 1998 but continues to be available as a consultant.

In May of 1992 we changed the company name to Tetra Medical Supply Corp. to more closely identify ourselves with the market that we serve.

I currently hold the title of Chairman of the Board and Chief Financial Officer. We have been certified as a woman owned business for many years. Presently, we are certified by the state of Illinois and the Women's Business Enterprise National Council.

Our employees are the most valuable asset of our company. We are a small, close knit group that continues to grow the business with team work, great customer service and a family atmosphere. We hope that you enjoy our new catalog and refurbished website which was put together with input from all of us. And we thank you for the opportunity to be of service to you and your organization.

Constance A. Shier

ELASTIC BANDAGES

Elastic bandages were the first Tetra product and they continue to account for over fifty percent of our sales. The consistent quality and trend setting styles keep our bandages in the forefront. From the top of the line TETRA-FLEX bandages to the most economical style, the quality and the performance satisfy even the most particular customers. All of our elastic bandages are Latex-free.

0151 Tetra-Flex™CF

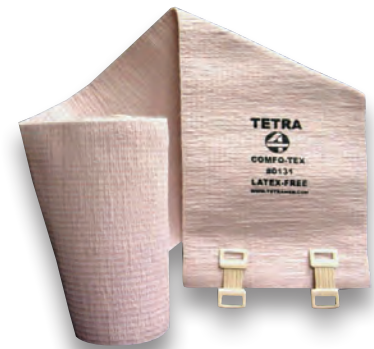

NOW CLIP FREE. Our finest quality, top of the line, heavy duty woven latex free elastic bandage. The 0151 is clip free with our new self-closure system, making it easy to adjust and eliminate the need for clips or tape. Manufactured from a premium weave of spandex and selected long staple cotton with uniform compression throughout its construction. This bandage is especially suited for prosthetic applications, physical therapy, sports medicine and rehabilitation. The high cotton content allows for repeated use and washings. Each bandage is individually wrapped.

0510 Standard Woven

This is an economical, lighter weight woven elastic bandage. Reinforced spandex with a blend of cotton and polyester. Excellent bandage for compression and support. It readily conforms to the anatomy and is soft and comfortable to wear due to a high percentage of cotton yarns. Individually wrapped with stretch clips.

ELASTIC BANDAGES, CONT'D.

6611 Hook Lock™

The Hook Lock is our finest quality knitted elastic bandage. The unique loop lock design is manufactured with a blend of cotton and polyester yarns. This allows for secure adherence and can be easily removed. The Hook Lock utilizes Velcro® at both ends to secure the bandage easily. The front closure secures the bandage in place and the end closure eliminates the need for tape or clips. Each roll is individually wrapped. Hook Lock is washable and reusable. Latex-free.

Tetra Lymph-Wrap Bandage

100% cotton, short stretch bandage designed for various medical applications. Such as Lymphedema management, primary and secondary varicosis, edema, post-thrombotic syndrome, thrombophlebitis and phlebothrombosis. Extensible merely because of their weave, the rubberless fibers reduce the risk of constriction yet provide strong compression in a non-irritating bandage which is permeable to air. They are most commonly used to apply the final compression for lymphedemic therapy. Latex-free.

OTHER BANDAGES

STERILE Textured Esmarch Exsanguination Bandage 7134, 7136

NOW POWDER FREE, TALC FREE. Used to control and exclude blood flow during surgical procedures, Tetra Esmarch is constructed of strong, white synthetic material to provide maximum compression in a totally powder free, talc free and latex free product. The first of a kind textured finish allows for better gripping and easier application. The polymer used offers excellent elongation with no weak points prone to breakage in applications requiring extended stretching. Tetra Esmarchs are eco-friendly and have no added fillers harmful to the environment.

TOURNIQUETS

Tourniquets

Tear and slip resistant, powder-free, latex free, 1" x 18", 0.62 mm thickness. Textured finish makes it easy to grip, tie and untie and eliminates pinching, with a tie-type closure (non-pneumatic). This Tetra tourniquet uses a formula of synthetic (latex free) rubber that produces the unique non-slip, powder free surface. This provides added durability and excellent stretch and recovery. Tetra Tourniquets can be sterilized with Gamma or ETO. Available colors are blue, pink and orange.

STOCKINET

0171

0178

Impervious

0181 & 0191

Tubular Stockinet 0171

Woven of soft-spun, long staple cotton yarn. Close knit rib stitch insures a fine gauge stockinet with maximum elasticity. Ideal for use under plaster casts, over regular dressings for added protection, during surgical procedures for skin protection or in the manufacture of orthopedic appliances. Also used in industrial settings for cuff covers or wrist-lets. Tubular stockinet is unbleached and sold in 25 yard long rolls in dispenser boxes. Available in 2", 3", 4", 6", 8", 10" and 12" widths.

Synthetic Tubular Stockinet

0178

New casting materials necessitate the addition of a synthetic stockinet product. We chose a pure white, 100% polyester fiber which stretches over two times its width yet stays snug without constricting. It wicks moisture away from skin and dries quickly. Packed in 25 yard rolls in dispenser box. Widths include 2", 3", 4", 6", 8" and the hard to find 10" and 12" rolls.

Pre-Cut, Pre-Rolled Stockinet

0191

Bulk rolls of fine, long staple cotton yarn in single or double ply, in various lengths and 2", 3", 4", 6" and 8" widths. Sold by the roll in case quantities to your specifications. Call for pricing or special orders.

Sterile Impervious Stockinet

A stretchable, impervious, blue material is pre-rolled outside our pre-cut, pre-sewn, single ply, synthetic stockinet to help prevent lint transfer and to provide a moisture barrier. Each sterile roll is sealed in a Tyvek/poly pouch and radiation sterilized.

Stock No.	Size	Unit of Sale

LIFE SPAN ANTI-EMBOLISM STOCKINGS FROM TETRA

Life Span Anti-Embolism stockings are made of a special light weight 2-way stretch knit of 71% polyester and 29% nylon and covered spandex which enables the stocking to adapt to variations of leg sizes better than standard knits. All stockings feature a gripper bottom to prevent slipping and a full knitted in heel pocket to ensure proper foot alignment. A front seam has been added for straight applications.

All Life Span Anti-Embolism stockings are latex free.

Our knee length has a no bind top with ribbed spandex to hold in place. The thigh length also has ribbed spandex sewn into the gussett and rubber gripper sewn into segments in the top to stay up without the effect of a tourniquet.

KNEE-LENGTH STYLE

For proper fit measure calf circumference to determine "size" (S,M,L,XL) and measure distance from bend of knee to bottom of heel to determine "length" (regular, long) when dealing with borderline measurements apply the smaller size stockings.

Stock No.	Size	Color Code	Calf Circumference	Length
2222-01	Small - Regular	Yellow	Up to 12" (30.5cm)	Up to 16" (40.6cm)
2222-02	Medium - Regular	Neutral	12" - 15" (30.5cm - 38.1cm)	Up to 17" (43.2cm)
2222-03	Large - Regular	Blue	15" - 17 1/2" (38.1cm - 44.5cm)	Up to 18" (45.7cm)
2222-04	X-Large - Regular	Green	Over 17 1/2" (44.5cm)	Up to 18" (45.7cm)
2222-11	Small - Long	Yellow	Up to 12" (30.5cm)	Over 16" (40.6cm)
2222-12	Medium - Long	Neutral	12" - 15" (30.5cm - 38.1cm)	Over 17" (43.2cm)
2222-13	Large - Long	Blue	15" - 17 1/2" (38.1cm - 44.5cm)	Over 18" (45.7cm)
2222-14	X-Large - Long	Green	Over 17 1/2" (44.5cm)	Over 18" (45.7cm)

CAUTION: Federal (USA) Law restricts these devices to sale by or on the order of physician.

THIGH-LENGTH STYLE

For proper fit measure calf circumference to determine "size" (S,M,L,XL) and measure distance from gluteal furrow to bottom of heel to determine "length" (short, regular, long). CAUTION: If circumference of upper thigh exceeds 25" (63.5cm). Do not apply these stockings.

Stock No.	Size	Top Color Code	Toe Color Code	Calf Circumference	Glut. Furrow to Heel Length

DECUBICARE

Stock No.	Size	Unit of Sale
0805-00	Small / Medium	Case of 12 pair
0806-00	Large / X-Large	Case of 12 pair

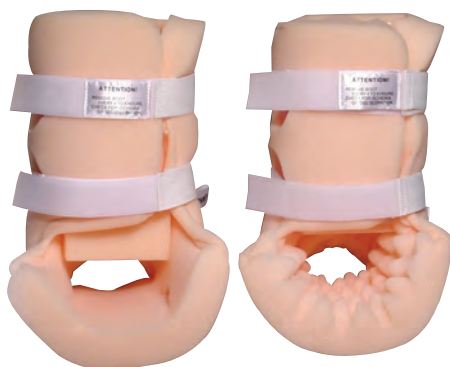

Ventilated Net 0805 & 0806

The Ventilated Net style consists of a two way stretch fabric in an open-knit to eliminate heat build-up. The fabric automatically adjusts to give proper fit and contains a double-layer, seamless foam cushion sewn inside.

Heelbo™

Heelbo heel and elbow protector is a comfortable sock made of a flexible stretch weave with an air-cushioned contour foam pad used to help prevent dermal ulcers. The proximal cuff is looser to fit the upper arm or ankle while the distal stitch is stronger and tighter to prevent migration. The protector pad free floats so the outer sock can move while the protector pad stays in place. For sizing, use chart above and measure arms at biceps and feet at the widest part of the foot.

9910-00

Heelift® Suspension Boots

Effectively removes pressure from the heel by lifting with an elevation pad and suspending the heel in protective space thereby transferring pressure to the lower leg. Appropriate in prevention as well as treatment regimens. Ventilation holes allow for air circulation and patient comfort. Heelift boots use two padded Velcro fastening straps to adjust to all patients, with or without dressings. A tricot backing allows the boot to move freely without displacing the heel. Two elevation pads, one fixed and one loose, allow a custom fit for every patient. Application instructions are included. Available in two styles of foam, the original convoluted and smooth for edematous legs or patients with very sensitive skin. Heelift can be hand washed with cool water and a mild cleanser. Air dry. One size fits all.

Abdominal Binder 1241-1

Manufactured of knitted elastic and closed with Velcro. This economical binder has double darts in the back. 10" wide elastic is sized by hip measurements.

Tetra Abdominal Binder 1242 & 1243

Deluxe plush elastic abdominal binder. There are four flexible stays in the back area and two flexible stays in the abdominal area. Plush elastic for maximum comfort and flexible stays provide additional support and help prevent rolling. Wide Velcro closure for adjustability. The abdominal binder is designed for compression on the upper and lower abdomen and to accommodate the use of surgical drainage tubes. Care must be exercised so as not to cause discomfort or irritation to a wound site. A hole can be cut into the binder by cutting an elliptical "X" into the material. When stretched, the cut will become a round hole to accommodate the drainage tube.

ARM SLINGS

Universal Envelope Arm Sling 1200-7N and 1200-7P

Our most popular arm sling is a deluxe sling of cotton duck material in a denim color with an open ended "D" ring design. Adjustment from pediatric to adult sizing is achieved with Velcro strips inside the sling. Beneath the "D" ring a swatch of foam peels off to reveal the hook portion of the Velcro. The extra long portion shown inside the sling is the loop portion. By exposing the hook, the desired length is attained by folding the sling back on each side and attaching the hook to the loop area. Strap adjusts with buckle in the back portion and Velcro through the D ring in the front portion. The sling can be purchased with a shoulder pad (**1200-7P**) or without (**1200-7N**). One size. Individually poly-bagged. Min pouch size: 8" x 11". Max pouch size 8" x 17".

ARM SLINGS, CONT'D.

Envelope Arm Sling 1200-0

Denim material, closed-end design to ensure more definite support of elbow and arm. Sturdy web strap with buckle closure.

Muslin Arm Sling 1201-2

Same design as 1200-0 in un-bleached muslin. Also available in boxes of 12 slings as 1201-4.

Stock No.	Size	Pouch Size
1200-01	Small	6" x 10"

Soft Cervical Collar 1502

A soft foam collar. Width varies with sizing from small to x-large. Extra stockinet sleeve is included.

1502

COLLARS, EMERGENCY

An infant and pediatric collar for ages 3 to 13 years is also available as product number **1554-IN** for infants and **1554-TC** pediatric.

Philly Type Cervical Collars

Collar is made of lightweight foam and plastic. Comfortable and effective for many conditions and molded and shaped to conform to any patient. Double Velcro® closure permits easy adjustments, plus rigid plastic occipital and mandible posts insure solid support where it is most necessary. The mandible post has a large oval opening in the trachea style for emergency medical use.

EMT One Piece Collar 1624

Injection molded polyethylene shell with pre-molded level chin support attached to foam padding. Collar features color coded straps and labels, enlarged trachea opening and rear ventilation. Stores essentially flat. X-ray, CT and MRI compatible. Color coded as follows:

Stock No.	Size	Unit of Sale
1624-02	Short	Blue
1624-03	Regular	Orange
1624-04	Tall	Green
1624-05	Low	Purple

EMT Select Collar 1626

Universal adjustable emergency collar featuring injection molded polyethylene attached to foam padding touching the skin. Patented chin support in an essentially flat design. Radiolucent. Measurement and application instructions are included in packaging.

Pediatric Universal Collar is Stock No. **1626-10**.

CLAVICLE SPLINTS

To determine proper size for all clavicle splints, measure one side from center back up over shoulder, around under arm and back to center of back.

Clavicle Splint 1508-0

Figure eight design is comfortable and economical for fractures of the clavicle (especially in children) and as after treatment following more rigid clavicle dressings. Made of orthopedic felt covered with cotton stockinet. Adjustable straps with slide buckles provide good control of forward or downward displacement of shoulder.

Stock No.	Size	Fits Measurements
1508-00	Infant	8" - 14"
1508-01	Small	14" - 20"
1508-02	Medium	19" - 28"
1508-03	Large	24" - 33"
1508-04	X-Large	30" - 39"

Deluxe Clavicle Splint 1508-1

Two stockinet covered felt straps secure around "O" ring over felt pad for more rigid support. Velcro® holds straps in place.

Stock No.	Size	Fits Measurements
1508-10	Pediatric	14" - 17"
1508-11	Small	15" - 20"
1508-12	Medium	18" - 25"
1508-13	Large	22" - 29"
1508-14	X-Large	25" - 33"

Heavy-Duty Felt/Foam Clavicle Splint 1508-2

Colored foam sewn to felt and strap webbing for stability. Two straps with Velcro closure attached through triangular metal piece sewn to support.

Stock No.	Size	Fits Measurements
1508-21	Small	18" - 25"
1508-22	Medium	22" - 29"
1508-23	Large	25" - 33"

ELBOW SPLINTS & SUPPORTS

Tetra-Foam Tennis Elbow Splint 1433-00

Lightweight, pressure sensitive fabric provides comfort and economy. Elastic extension piece and two Velcro® swatches give this splint the desired fit and pressure. One size for forearm circumferences of 6" - 14". Individually boxed.

Vinyl Tennis Elbow Splint 1433-10 & 1433-30

Vinyl laminated to foam and nylon tricot is easily wiped clean. Loop lock closure provides easy application and tension adjustment. **1433-10** is a 2" width splint and **1433-30** is a 3" width. Forearm circumference 7" - 15". One size fits most. Individually boxed.

Gel-Band® Tennis Elbow Supports 1433-40 & 1433-50

Provides therapeutic support without restricting circulation. Loop lock closure with elastic tension strap. GelCell™ insert can be cooled or heated for therapy. Individually boxed with instruction sheet. Latex free.

Stock No.	Size	Forearm Circumference
1433-40	X-Small	7" - 11"
1433-50	Universal	11" - 16"

ProLite® 3D Elbow Support 1433-7

Comfortable, firm support for weak or injured elbows. Constructed with a 3D design and moisture wicking fibers. Anatomically contoured with non-restricting upper and lower cuffs. Stabilizes with comfortable slip-on, 4-way stretch elastic and medical grade silicone insert for consistent compression. Latex free. Hand wash in cold water. Measure 4 3/4" below elbow joint.

Stock No.	Size	Arm Circumference
1433-71	Small	8 1/4" - 9"
1433-72	Medium	9" - 9 7/8"
1433-73	Large	9 7/8" - 10 5/8"
1433-74	X-Large	10 5/8" - 11 3/8"

Elbow/Wrist Immobilizer 1434

Prevents elbow and wrist flexion. Ideal for passive restraint and limb protection for both children and adults. Uses such as: Protect IV sites, post op facial procedures to avoid hand contact with dressings, or whenever limb immobilization is required in these areas. Made of soft foam- skin side, durable stays and navy/white poly cotton finish. Hook/loop closure. LATEX FREE.

Stock No.	Size	Sizing (Circ)	Dims
1434-00	XS, Infant	Fits 7" circumference	4" x 7"
1434-01	SM, Child	Fits 9" circumference	6" x 9"
1434-02	MD, Youth/Adult	Fits 11" circumference	7" x 11"
1434-03	LG, Adult	Fits 15" circumference	10" x 15"

KNEE IMMOBILIZERS

Snoopy® 1203-00

A 12" poly cotton bound foam lined with nylon tricot. One each medial and lateral stay and three contoured posterior stays are all removable. Hook/loop closure around metal loop-lock buckle to provide better adjustment. Measure 6" above and below knee. Universal style fits 10" - 14" above and 6 1/2" - 10" below. Poly bagged.

Knee Immobilizers 1213

Designed for immobilization of the knee following surgery, therapy or injury. Two posterior metal stays to resist torsion. Stays can be removed for laundering. Constructed of foam bonded to limited pile with Velcro® closures for more precise support and ease in fitting. Measure circumference 6" above and 6" below knee. Individually boxed.

20" Stock No.	Size	Top Measurement	Bottom Measurement

KNEE SUPPORTS

ProLite® 3D Compressive Knee Support 1238

Genumotion Elastic Knee Support with 4-way stretch, knitted elastic compression support. Provides compression and stabilization while allowing flexibility. A viscoelastic insert surrounds the patella for added stability. Flexible, integrated spiral stays provide medial and lateral support. The knit pattern in the popliteal area discourages bunching. Measure around the leg 5 1/2" above the center of the kneecap and order from chart. An instruction booklet is enclosed with each support.

Stock No.	Size	Circumference
1238-01	Small	16 1/8" - 17 3/8"
1238-02	Medium	17 3/8" - 18 1/2"
1238-03	Large	18 1/2" - 19 3/4"
1238-04	X-Large	19 3/4" - 20 7/8"

Standard Knee Compression Support 1272-A

A slip-on, closed patella support, shorter in length, with a relaxed knit pattern in back of the knee to prevent bunching. Measure circumference just above the knee.

Stock No.	Size	Circumference
1272-A1	Small	12" - 15"
1272-A2	Medium	15" - 18"
1272-A3	Large	18" - 21"
1272-A4	X-Large	21" - 24"

Deluxe Knee Compression Support 1272-0

An 11" slip-on elastic support with closed patella. Measure knee circumference.

Stock No.	Size	Circumference
1272-01	Small	11 1/2" - 13"
1272-02	Medium	13" - 14 3/4"
1272-03	Large	14 3/4" - 16 1/2"
1272-04	X-Large	16 1/2" - 17 1/4"

Gel Band Patella Strap 1410-00

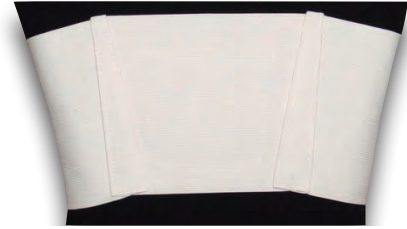

U-Point gel insert exerts pressure on the tendon below the kneecap. Double loop lock closures for comfortable adjustment. Universal sizing fits 11" - 18" knees. Reversible to superior position. Instructions included.

RIB BELTS

Deluxe Male Rib Belt 1211

A sized elastic rib belt in 6" width. Three Velcro® strips ensure positive closure and adjustment. Used to treat fractures and bruises in the rib cage area and also to ease the discomfort caused by violent coughing. Double dart construction prevents rolling and assures natural contour. Does not contain stays. Individually boxed.

Stock Numbers	Size	Chest Circumference
1211-01	Small	24" - 30"
1211-02	Medium	30" - 36"
1211-03	Large	36" - 42"
1211-04	X-Large	42" - 48"
1211-05	XX-Large	48" - 54"

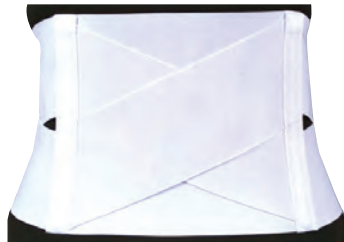

Deluxe Universal Male Rib Belt 1391-00

6" wide elastic belt without darts. Measures 39" in relaxed length and fits chest circumference of 29" - 45". Individually boxed.

Deluxe Universal Female Rib Belt 1392-00

6" wide elastic belt contoured in front to 4". Measures 39" in relaxed length and does not have darts. Top portion of belt is bound with elastic for comfort. Individually boxed. One size fits 28" - 50" chest circumference.

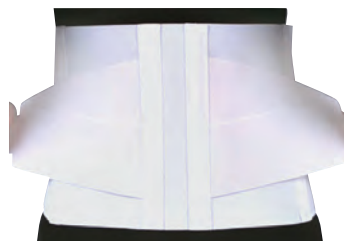

SACRAL SUPPORTS

X-Type Sacral Belt 1202

Designed to ease pressure on the sacral (lower back) region. X-construction of belt transfers part of the weight of the thorax and upper body directly to the pelvis. 4" standard elastic forms a criss-cross over a 9" elastic form. Stays are built-in for firm support and to prevent rolling. Velcro® closure. Individually boxed.

Stock No.	Size	Hip Measurement
1202-01	Small	24" - 30"
1202-02	Medium	30" - 36"

Shoulder Immobilizer with Straps 1206-4

Soft flannel on foam with extra long attached humerus cuff and two forearm cuffs. Wide shoulder strap secures and adjusts with slide buckle. Elastic panel in back for greater compression. Reversible to fit either arm.

Stock No.	Size	Fits Chest Size
1206-41	Small	Under 34"
1206-43	Large	Over 34"

SHOULDER IMMOBILIZERS, CONT'D.

Universal Snoopy® Shoulder Immobilizer 1206-40

Same construction as 1206-4 with a Snoopy or Peanuts pattern on the support surrounding the body. Completely washable after removing stays and closing hook/loop. One universal child size fits chest circumference of 20" to 30".

Stock No.	Size	Pouch Size
1206-71	Small	6" x 11"
1206-72	Medium	7 1/2" x 12 1/2"
1206-73	Large	9" x 16 1/2"
1206-74	X-Large	10 1/2" x 20"

Denim Shoulder Immobilizer 1206-7

An economical method of shoulder immobilization. A denim, envelope style sling with a denim swathe that attaches to the front of the sling with a positionable hook on a webbed strap. Wide webbed strap over shoulder is adjustable with slide buckle and closes with Velcro around two "D" rings.

WRIST WRAPS

Stock No.	Size	Color
1292-00	Universal	White
1292-01	Universal	Beige
1292-02	Universal	Black

Universal Wristlet 1292

3" plushback elastic. Narrow elastic thumb loop for easy, one hand application tucks away into support. Velcro closure. One size fits most.

1292-00

1292-01

1292-02

Universal Wrist Wrap 1293-00

Economical 3" wide, latex free elastic wrap. Special loop elastic stretches to fit wrist circumferences of 4" - 11". Velcro hook covers the width of the support.

WRIST / FOREARM SPLINTS

Universal Vinyl Wrist/Forearm Splint 1216-00

A two piece splint with perforated vinyl on the outside and tricot laminated to foam on the inside. Velcro loop lock closures on six alternating straps in wrist/forearm area and two Velcro strips at palm area. Two removable stays in front and two in back. This splint is 12" in length, can be used for right or left hands and one size fits palm widths of 2 1/2" to 4 1/2".

Universal Tetra-Foam Wrist/Forearm Splint 1453-00 Right & 1453-10 Left

A soft, thick foam interior laminated to pressure sensitive, plush pile outside. Preshaped palm stay is removable and posterior stay is repositionable with three hook and loop straps attached. Loop lock completes the splint for one size adjustment. Fits palm widths of 2 1/2" - 5 1/2".

WRIST SPLINTS / SUPPORTS

Snoopy® Wrist Splint

Heavy cotton material with Snoopy pattern bonded to tricot material on the inside. Palmar and dorsal stays are removable. Two loop lock Velcro strap closures on the pediatric size (18 months up to 2" palm width) and one for the 6 to 18 month infant size. Both sizes have a single strap at the thumb area. Specify right or left.

Stock No.	Fits
1218-05 - Right	6 to 18 months
1218-06 - Right	18 months to 2" palm
1218-15 - Left	6 to 18 months
1218-16 - Left	18 months to 2" palm

Canvas Cockup Splint 1218

A heavy canvas duck material with a flannel interior. An elastic insert for ease in application. Two loop lock Velcro strap closures and one single strap at thumb area in 6" splint and three Velcro loop locks on 8" splint. Removable palm stay and steel posterior stay. Specify right or left.

Loop Lock Wrist Splint 1299-0 Right & -1 Left

Our loop lock splints are a comfortable way to protect and immobilize for all conditions requiring restriction of the wrist area. A foam core is laminated to a beige polyester and cotton material outside and covered with a soft cotton stockinet on the inside. Double ply stockinet forms the splint into a cylinder under the loop lock Velcro closures. A removable palm stay and a permanent support bar complete the 9" splint.

Pediatric Cast Boots

All cast boots are available in x-small which serves as a pediatric size.

WALKERS

Darco Body Armor Walkers 1406

The same hard shell, circumferential protection as a cast. A black outer shell and black liner of thick foam encased in black brushed nylon for protection and comfort. Leverage fasteners, similar to ski boot buckles, are attached directly to the shell to give a more controlled compression. A beveled rocker sole helps to prevent slipping. Available in high and low styles, replacement liners are also available. Order by shoe size.

4502 Low Profile Walker-Fixed Ankle 4520 Low Top Walker-Fixed Ankle

An ultra low profile walker with a full rocker sole to provide smooth heel-to-toe transition. The padded liner is washable and double vented to promote air circulation. Anatomically contoured stirrups prevent ankle motion without causing friction against the sides of the calf. A full-length insole of pressure-moldable comfort foam conforms to the foot. Four separate comfort pads included to aid in immobilizing and padding the brace.

NEOPRENE SUPPORTS

ABOUT OUR NEOPRENE SUPPORTS...

The unique 4-way stretch provides uniform compression to maintain shape and efficiency, affording superior comfort without impeding circulation. These supports soothe pain, encourage circulation, help relieve edema and reduce evaporation. Make soft tissue pliable, less prone to injury. Easy to apply and remove, fits snugly and comfortably under garments.

Unless otherwise indicated, all Neoprene knee sleeves are 12 1/2" long and are available in extra-small through extra-large sizes. For proper sizing, measure the knee circumference.

IMPORTANT: Neoprene devices are to be used under the supervision of a physician. Some individuals may be sensitive or reactive to the neoprene or nylon utilized in the manufacture of these products. If user experiences any skin irritation, discontinue use of product immediately and consult a physician.

Standard Knee Sleeve

Tapered in the back for a comfortable fit.

Wrap around style closes with single hook strap. 1/8", Plush 1, Nylon 1. Provides warmth and compression while abducting thumb. Can be trimmed for custom fit.

FINGER & THUMB SPLINTS

Aluminum Splints - lightweight, rigid aluminum splints provide the support necessary to protect from further injury during the healing period. Padded styles consist of 1/4" polyester foam bonded to the rigid aluminum. Please order by stock number and description listed below. If available in both styles, please specify padded (P) or Unpadded (O).

Plastic Splints - lightweight, neutral-colored, usually used without padding. Provides protection for the top as well as the back of the finger and thumb. **Both styles are available in kits or individually.**

These special splints are constructed of vinyl-coated aluminum. They are pre-formed to apply to specific areas of injury but may be molded and shaped to fit individual, specific body contours. Most splints are available in padded or unpadded styles. The padded styles consist of 1/4" polyester foam glued to inside of vinyl-coated aluminum splint. Each splint is poly-bagged and may be ordered in any quantity. Please specify padded or unpadded when placing your order and specify right or left if it applies.

HOT AND/OR COLD THERAPY

Ice Bags 1750 Series

To compliment our line of hot and cold therapy items, these bags are designed as an economical approach to the rubber ice bags which generally are three to four times more expensive. They are a single patient use item. The materials used in construction are white flocked vinyl on the surface that touches the body, white taffeta embossed vinyl on the top portion with a Halkey-Roberts valve. The positive seal of the seams and valve provides a leak proof unit. The vinyls used can withstand a zero degree cold and can also be used with hot water for heat therapy uses. All bags are individually poly wrapped and packed 12 bags per carton.

Stock No.	Description	Size
1750-00	Straight Ice Bag	4" x 12"
1751-00	Curved Ice Bag	4" x 12"
1753-00	English Ice Bag	9 1/2"
1754-00	Standard Ice Bag	8" x 13"

The materials used in construction are white flocked vinyl on the surface that touches the body, white taffeta embossed vinyl on the top portion with a Halkey-Roberts valve. The positive seal of the seams and valve provides a leak proof unit. The vinyls used can withstand a zero degree cold and can also be used with hot water for heat therapy uses. All bags are individually poly wrapped and packed 12 bags per carton.

INSTA-COLD PACKS

All TETRA 1731 chemical packs contain ingredients that are non-toxic and non-caustic, thereby eliminating the possibility of patient injury; and, TETRA chemical packs are designed for single patient use, minimizing the danger of cross-contamination and providing an easily identifiable patient charge. The packs are still manufactured by hand so we can incorporate the water bag at the top for easy activation.

Tetra Insta-Cold® 1731-00 & 1731-08

TETRA cold packs use Urea and Ammonium Chloride to achieve a more effective cold therapy session. The use of cold treatment or cryo therapy for injuries has been medically recognized as beneficial for years. The application of cold produces an anesthetic effect, relieving aches and pains. Tetra Insta-Cold is a convenient way to handle cold compress therapy. Non-toxic and non-caustic ingredients.

Stock No.	Size	Unit of Sale
1731-00	Insta-Cold Standard (6" x 9")	Case of 16
1731-08	Insta-Cold Handy Pak (4 1/2" x 7")	Case of 24

Tetra's insulated outer bags on the Insta-Colds utilize a special non-woven material that enhances the therapy time and greatly diminishes the extreme hot or cold spikes that you experience with other clear plastic outer bags. ***Periodic re-shaking of TETRA's INSTA-COLD products will prolong the original cold.***

AFO

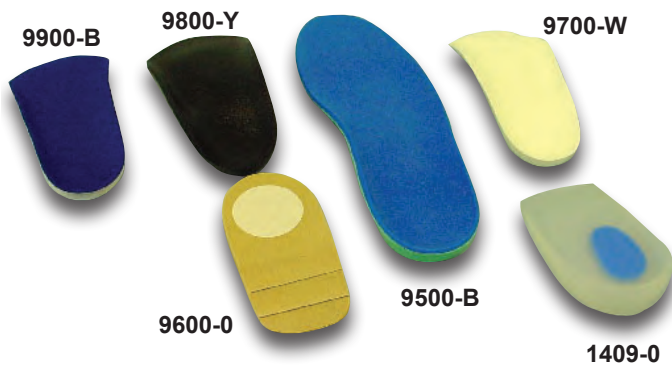

Swedish Ankle Foot Orthosis

The Swedish AFO is an injection molded polyethylene splint providing static dorsiflexion assistance and lateral stability for the entire foot-ankle area. The injection molding allows for thicker polyethylene on the vertical aspect for rigidity and a thinner foot plate that may be trimmed with a pair of ordinary scissors. A heat gun may be used to further form splint if desired. The low arch and open heel give it a streamlined profile that fits easily into any shoe. Padding is provided on the calf section for extra comfort. A Velcro® strap secures the AFO around the calf. Specify right or left, male or female style.

Stock No.	Description	Size

FOOT ORTHOTICS

Foot Orthotics - Preformed

TETRA foot orthotics are pre-formed styles available in full foot, three-quarter foot and heel lift. Sold in pairs except for the 9600-0.

Full foot, **9500-0**, is a 1/4" plastazote material which can be trimmed to fit. The Adjustable Heel Lifts, **9600-0**, are a firm rubber material in layers to peel off and adjust to leg length discrepancies giving a 4, 6 or 8 mm lift. 3/4 length is available in 7 sizes and three densities, **9700-W**, **9800-Y** and **9900-B**. Low density is covered with a nylon cover. **1409** Soft Line Heel Cups are 100% silicone in two densities which adapt to the anatomy of the foot. Order by shoe size.

0912-02	Medium	35" - 41"
0912-03	Large	41" - 46"

SCISSORS / INSTRUMENTS

9000-00 Punch

Cut-Alls 9000-00 & 9000-01

Cut-Alls were originally designed under military specifications for use by Armed Forces Paramedics. As such, their construction allows the user to easily cut through heavy or multiple layers of cloth and/or zippered clothing. Their finely serrated cutting blades allow them to cut the following materials: Orthopedic felt, rubber tubing, leather, soft metals such as aluminum, non-woven fabrics, plastics, vinyl and cotton or synthetic webbing.

9000-01 Flange

Cut-Alls are manufactured from high-grade, stainless steel. This combination of stainless steel and their unique angular cutting blades produces an instrument that is strong enough to cut a copper penny in half and yet accurate enough to be used when precision cutting is needed. They are 7 1/4" in length. The finger rings are of molded polypropylene and are of ambidextrous design. Fully autoclavable and extremely lightweight (2 ounces). Available in punch point #9000-00 and flange point #9000-01.

Jr. Cut-Alls 9000-02

Smaller version measuring 5 1/2" with a covered punch point and constructed of floor grade stainless steel. Also autoclavable up to 143° C/290° F.

Utility Shears 8108

7 1/4" floor grade 420 stainless steel with flange point. Available in 6 colors and black. Please specify color when ordering. All colors are autoclavable.

We have added three specialty scissors for the athletic trainer market. All are constructed from Japanese 410 Stainless Steel with a non-glare satin finish and razor sharp edges for a superior cut.

Lister Scissors 8106-80

The largest of our line of Lister Bandage scissors at 8". Pictured on the top.

Pro-Trainer Scissors 8000-10

Pictured in the center, this scissors is 8 inches long. Bottom blade has a serrated edge, a blunt end to easily slip under gauze or tape and a large ring.

Super Pro-Trainers 8000-20

Pictured on bottom, 9 1/4" long with one large angled ring and a blunt end.

Bandage Scissors 8100 Series

All bandage scissors are manufactured with 410 stainless steel that will resist corrosion.

Measurement/Compression Guide

for Tetra-Grip Tubular Elastic Bandage

Latex-free and packaged in 11 yard rolls - see page 6 for additional product information

Note: Apply only a SINGLE LAYER to provide the pressure/compression noted below.

To determine the correct compression: Using a standard paper tape measure (for single patient use), measure around the widest circumference of the extremity. Pressures are based on compression applied as a single layer. Select desired pressure and match measurement to determine size.

Stock No.	Size	LOW PRESSURE 5 - 10 mm Hg	MEDIUM PRESSURE 10 - 20 mm Hg	HIGH PRESSURE 20 - 30 mm Hg	Extremity Guide	Approx. Relaxed Width

TERMS & CONDITIONS

OFFICE HOURS

- TETRA office hours are 7:30 A.M. to 4:30 P.M., central time, Monday thru Friday. After-hour and Holiday calls will be answered by a recorder. Orders placed by recorder will be filled on the next business day.

ORDERING

- If you wish to fax your orders, our FAX machine is available 24 hours a day: (847) 647-9034.
- E-Mail Orders to: sales@tetramed.com
- Allow three weeks for delivery on all items marked "special order".

TERMS

- We accept MasterCard, Visa, Discover and American Express at time of sale for your convenience.
- Payment terms are net 30 days, F.O.B. Tetra Medical Supply Corp. (for established accounts). A late charge of 1.5% per month on the unpaid balance will be added to overdue accounts.
- Minimum billing amount will be \$25.00.
- We are striving to increase our product line with quality items and improve our current products. With this in mind, we reserve the right to change, modify, add or discontinue products without prior notification. We will do our best to inform customers using these products in advance, but accept no responsibility for not doing so.

SAMPLE POLICY

- If you wish to order one or more of our products for evaluation, you will be billed at a discounted sample price. If the sample is not satisfactory, and it has not been used, you may return it prepaid to us and your account will be credited in full. Please let us know when your order is for evaluation to avoid confusion.
- After 30 days, products purchased for evaluation may not be returned for refund.

RETURN POLICY

- In accordance with our desire to provide the finest quality and service to health care institutions, we will promptly and unhesitatingly, at no cost to the customer, accept for return:
 1. Products which may be defective.
 2. The results of shipping errors on our part.
 3. Products purchased for the first time on a trial basis.
- ALL returns must have prior written authorization from Tetra Medical Supply Corp. For item returns resulting from customer error, the items must be returned prepaid and must be in a resalable condition. Returns within 30 days are subject to a ten (10) percent restocking charge. Returns after 30 days are subject to a twenty-five (25) percent restocking charge. We will not accept any returns after 180 days. Sterile products will not be accepted for return.

ENDORSED AND PRESCRIBED
BY
THE MEDICAL PROFESSION THROUGHOUT
THE ENTIRE WORLD

THE
TETRA BANDAGE
ELASTIC WITHOUT RUBBER

THE TETRA BANDAGE IS AN ENTIRELY RUBBERLESS ELASTIC BANDAGE WOVEN OF PURE COTTON. THE ELASTICITY IS DUE TO ITS PECULIAR WEAVE.

AFTER CONTINUED TENSION, THE ELASTICITY OF THE BANDAGE WILL NATURALLY DIMINISH. THIS CONDITION, HOWEVER, IS ONLY TEMPORARY, BECAUSE THE TETRA BANDAGE WILL FULLY REGAIN ITS ORIGINAL PROPERTIES ON BEING PLACED IN HOT AND THEN IN COLD WATER. AFTER THIS THE WATER SHOULD BE PRESSED OUT (AVOID WRINGING. DO NOT IRON) AND THE BANDAGE PLACED ON A FLAT SURFACE WITHOUT BEING STRETCHED, UNTIL THOROUGHLY DRY. THE BANDAGE IS NOW READY FOR FURTHER USE.

Non-Irritating

TETRA DOES NOT IRRITATE THE SKIN, BEING PERFECTLY POROUS. IT PERMITS THE FREE CIRCULATION OF AIR, THEREBY ALLOWING EVAPORATION OF PERSPIRATION.

ELASTIC WITHOUT RUBBER SOFT AND NON-IRRITATING. WILL NOT RAVEL. CAN BE STERILIZED. CAN BE USED REPEATEDLY. PURE COTTON PRODUCT.
