Tetra-Flex Clip Free Woven Elastic Bandage

Our Best Just Got Better!

Our Tetra-Flex bandage has been preferred by top orthopedic surgeons, head athletic trainers and key clinicians for years when compression and durability are an important component to treatment and therapy.

We have taken our finest quality, heavy-duty woven bandage and made it even better!

No more metal clips - Tetra-FlexCF is a premium weave of spandex and selected long staple cotton providing maximum compression and durability, and it now has a **NEW SELF-CLOSURE SYSTEM!** Easy to apply and adjust. Durable to withstand repeat washings and applications.

What's New: We have reengineered our closure that is unique to our premium construction for maximum and effective clip free closure (core end) that firmly secures the bandage in place. Up to this point, only lighter weight knit bandages were available in clip free. Now you can have a high quality bandage where maximum compression and durability are a critical component in post-op procedures or treatment.

Time Savings: Our new clip free system makes it quick and easy to apply and adjust the bandages for both the clinician and the patient and eliminates the need for tape or other materials to keep it in place.

Sizing: Non-Sterile and Sterile in 5.5 yards (stretched length) in four standard widths (2", 3", 4" and 6") and in 11 yards (stretched length) in 4" and 6" widths.

***SEE ATTACHED FOR ORDERING INFORMATION.**
